### Commentary

IXP opens at 6856; 3 points below previous close. Expected resistance at 6868 → 6895 and support at 6822 → 6804. The index reached the highest at 6865 and the lowest at 6830 and closed at 6843; 15 points below previous close. Liquidity ratio at the end of the day shows 44% buy. Profit taking dominated most of today's trades specially at KFH, NBK, and Zain. The price index reached near the resistance 6868 but it falls back and bounced from lowest point near the support 6822. The resistance was tested today but IXP failed and closed below previous close. The resistance will be tested again and the index might succeed in breaking it.
