Commentary

IXP opens at 6779; same as previous close. The market was flat for most of the day till the last 30 min when a buying pressure executed on selective stocks (KIB, KFH, Agility) that pushed the index further up to reach the highest point at 6823 and closed at 6810; 31 points above previous close. Liquidity ratio at the end of the day shows 55% buy and 45% sell. Another positive session with increase in value, volume, and trades. Few positive indicators were seen today that will keep the market optimistic; Value reaching 9.4 million KD, Blue chips buying pressure, reaching above level 6820, and closing at 6810.
