### Commentary

IXP opens at 6803; 6 points above previous close. Typical Thursday with low trades made it hard for the index to break the expected resistance at 6810 and therefore fell back to reach the lowest point at the support level 6760 which then bounced and closed at 6810; 13 points above previous close. We are still looking at breaking the resistance levels at 6810 and 6838 with high trades (+50 million KD) to reach 6980. Current support levels are at 6760, 6740, and 6711. In general the market is positive with indications of some shares being under collection.
