Commentary

IXP opens at 6717; 11 points above previous close. Expected resistance/target at 6760 targeting 6895 in the mid run and support at 6696 and 6670. The price index went from the lowest point at 6692 to close at highest point at 6725; 19 points above previous close. liquidity ratio at the end of the day shows 62% buy and 38% sell. The market is positive with liquidity is back above 20 million KD and volume to exceed 250 million shares. Very important to stay above 6696 for few consecutive sessions to build up a solid support. Next is a text to reach 6760 and then aiming to 6895, or back to 6640 and 6618.
