Commentary

IXP opens at 6853; same as previous close. The buying pressure continues on KFH, Agility and NBK that increased the total value for the fourth consecutive session reaching 16 million KD. The index reached the highest at 6876 and closed at 6830; 23 points below previous close. Liquidity ratio at the end of the day shows 65% buy and 35% sell. As expected, the index couldn't stay above the resistance level at 6860 and closed below it. The banks sector is still leading the market acquiring more than 50% of the total value traded. Next is to expect the blue chips to lead the market once again to break the resistance and stand above 6860.
