Commentary

IXP opens at 6806; 4 points below previous close. The buying pressure was obvious from the start of the session which pushed the index up to break the resistance levels at 6810 and 6838 with higher trades than previous close. The index closed at 6857; 47 points above previous close. The market needs to stay above 6838 for two consecutive days with trades between 40 and 50 million KD. Next resistance level is at 6877, managing to break this might lead the index to reach 6980 and then 7100 which considered to be a very critical level. Current support levels are at 6760, 6740, and 6711.
