Commentary

IXP opens at 6785; 8 points below previous close. Expected resistance at 6810, 6810 and 6895, support at 6760 and 6747. The price index reached the highest at 6805 but failed to continue and fell back to reach lowest point at 6748 breaking the support level at 6760 and then closed at 6759; 33 points below previous close. liquidity ratio at the end of the day shows 42% buy and 58% sell. We are still in a downtrend when analyzing the price index though the weighted index is still stable. Unless the price index bounce and pass the 6760 and stay above it, we might go to 6575 but that could happen on few sessions. Now the toughest resistance is at 6885 and the market doesn't have to power to break nor reach it. 6810 is critical and must reach it soon.
