### Commentary

IXP opens at 6776; 12 points below previous close. Expected resistance at 6810, and 6834, support at 6772 and 6760. The price didn't take long to bounce and break 6810 as it used to be a strong support but failed to reach 6834 due to the selling pressure and profit taking. The index reached the lowest point at 6768 around the support level 6772 and bounced to reach the highest at 6822 and then closed at 6813; 25 points above previous close. liquidity ratio at the end of the day showed 37% buy 63%. Today might have closed positively but the index needs to stay above 6810 for few consecutive sessions. Next resistance is 6834, and support is 6810 and 6772. Break the resistance will lead take us to 6850 and 6885.
