Commentary

IXP opens at 6881; same level of previous close. Expected resistance was at 6877 and 6928 to reach 6980, and support was at 6838 and 6810. Trading was weak during the first 2 hours compared to previous day. During the last hour one stock (National Consumer Holding Company) pushed the index 124 points up to break the resistances and reach 7004, and then closed at 7020; 138 points above previous close. Next resistance/target is at 7100 and support at 6980 but we're expecting it to be a weak support because of the low trades accrued and might go back below 6980 and reach 6877.
