### Commentary

IXP opens at 6782; 1 points above previous close. Expected resistance at 6785 and support at 6760. The index reached the highest at 6811 and the lowest at 6769 and closed at 6799; 18 points above previous close. Liquidity ratio at the end of the day shows 57% buy and 43% sell. the focus on blue chips continues as KFH and NBK still under buying pressure. Today was a positive session with increase in value, volume, and trades. the index managed to break the mentioned resistance and close above it which might lead to reach 6822 and then 6885/6895 in the coming few days.
