Commentary

IXP opens at 7012; 8 points below previous close. Expected resistance was at 7100, and support was at 6980. Trading was weak and volatile. National Consumer Holding Company yet again pushed the index 18 points up to reach 7039, and then closed at 7043; 23 points above previous close. Next resistance/target is at 7100 and support at 6980 but we're considering it as a weak support. The market still needs higher trades above 40 million KD.
