Commentary

IXP opens at 6850; 19 points above previous close. Expected resistance at 6838, and 6855, support at 6810 and 6763. The market opened with a positive gap that pushed the index to reach the highest point at 6895 breaking all resistance levels under 6900 but as a result of the weak and low trades the index fell back to reach the lowest at 6817 and then closed at 6830; 1 point below previous close. liquidity ratio during the first hour was showing 73% buy but at the end of the day it showed 45% buy and 55% sell. the market is lacking of liquidity and its very weak. 6885/6890 used to be a strong support but now it turned into a hard resistance that needs high and strong trades to break it. Real Estate sector is under huge selling pressure.
