Commentary

IXP opens at 6912; 4 points above previous close. Expected resistance at 6912 → 6936/6940 and support at 6885 → 6860/6853. The index reached the highest at 6917 and the lowest at 6880 and closed at 6899; 9 points below previous close. Liquidity ratio at the end of the day shows 50% buy. Volatility has reduced from previous day with stronger buying pressure on selective stock specially KFH reaching 83% buy and Alimtiazi 75%. Trading value, volume, and number of trades were all higher than previous day. Some stocks are still under buying pressure as many investors are increasing their ownership and reallocating their investment.
