Commentary

IXP opens at 6827; 4 points above previous close. Expected resistance at 6845 and support at 6822. The index reached the lowest at 6795 and closed at 6825; 2 points above previous close. Liquidity ratio at the end of the day shows 43% buy and 57% sell. Low and weak value continues as the market sees almost 7 million KD compared to 20+ million last week. Mazay had the highest cash flow/quantity reaching 92% buy. The price index closed above the support level 6822 but the value still low which means there is a possibility to reach lower levels next week if the value didn't rise. Resistance at 6842/6868, breaking this might lead to 6895.
