Commentary

IXP opens at 6764; 5 points above previous close. Expected resistance at 6810, 6844 and 6895, support at 6760 and 6747. The price index reached the lowest at 6755 then bounced to reach the highest at 6823 (+68 points) and then closed at 6798; 39 points above previous close. liquidity ratio at the end of the day shows 41% buy and 59% sell. The market might have reacted positively towards the decision of the Constitutional Court in rejecting all appeals which gives more stable political climate. The missing factor was the liquidity as it is still too low. Crossing 6810 shows the ability of regaining this level as a support level again and preparing to reach 6885 once again.
