### Commentary

IXP opens at 6806; 7 points below previous close. Expected resistance at 6828, and support at 6760. The price index reached the highest point at 6845 and then closed at 6830; 17 points above previous close. Liquidity ratio at the end of the day shows 57% buy and 43% sell. KFH & AUB are still within the top traded stocks as roamers have been increased of the expected merging between the two. Next target is reaching 6895 and this requires big and stronger trades and higher value to be able to reach this critical level. Succeeding to reach 6895 and stay above will increase the chances of reaching 7000.
