### Commentary

IXP opens at 6792; 6 points below previous close. Expected resistance at 6810 and support at 6772 and 6747. The price index broke the mentioned support levels and reached the lowest at 6695 then bounced to close at 6752; 46 points below previous close. liquidity ratio at the end of the day shows 28% buy and 72% sell. We're in a downtrend slope which might lead us to 6260 and 5747 which considered as major correction goals. Any rebound below 6810 is a temporary rebound unless the curve shows the opposite and moves from downtrend to uptrend slope. Next is either back to above 6772 and 6810 or we're heading down to reach 6575.
