Commentary

IXP opens at 6789; 41 points below previous close. The price index reached the lowest point at 6774 and then closed at 6803; 27 points below previous close. Liquidity ratio at the end of the day shows 35% buy and 65% sell. The market was influenced by the latest news of Saudi Arabia, UAE, Bahrain, and Egypt to cut relations with Qatar which had the greatest impact on Qatar market losing almost 8% in one session. The impact was little on KSE and the market might have absorbed. We're still targeting 6895 passing through small resistances to have 7000 as the main target.
