### Commentary

IXP opens at 6803; same as previous close. The price index reached the highest point at 6827 and the lowest at 6796, and then closed at 6801; 2 points below previous close. Liquidity ratio at the end of the day shows 44% buy and 56% sell. As stated in the previous report the market is over the shock of the relations cut with Qatar by the Arabian countries. Most importantly is to stay above 6820 and maintain a solid support to aim at reaching 6895 passing through small resistances to have 7000 as the main target.
