Commentary

IXP opens at 6745; 7 points below previous close. Expected resistance at 6772 and support at 6747 and 6704. The price index broke the mentioned support levels and reached the lowest at 6547 then bounced to close at 6564; 188 points below previous close. liquidity ratio at the end of the day shows 22% buy and 78% sell. The downtrend slope continues as we have reached a major correction goal at 6575 and closed below it which could be an indicator for a further fall to reach 6260 as a second major correction fall. We might have a rebound from this point or from 6260 and this will end the correction goals for the time being.
